

## Erratum

### **Patterns of *Ichthyobodo necator* sensu stricto infections on hatchery-reared Atlantic salmon *Salmo salar* in Norway**

T. E. Isaksen\*, E. Karlsbakk, G. A. Sundnes, A. Nylund

*Diseases of Aquatic Organisms* 88: 207–214, 2010

- On page 210, the position data in Table 2 were incorrect. The corrected version of Table 2 and its caption are shown below.

Table 2. Primers targeting 18S rRNA genes of *Ichthyobodo necator* sensu stricto (Isaksen et al. 2007) and *Ichthyobodo* sp. II (Todal et al. 2004). The BR11 primer matches both *Ichthyobodo* species. The CoNec-primers are specific to *I. necator* sensu stricto, and the CoEur-primers are specific to *Ichthyobodo* sp. II. Positions of the primers refer to *I. necator* accession no. AY224691 (\*) or *Ichthyobodo* sp. II AY229973(\*\*)

Name	Sequence	Position
BR11	5'-CAAATGGCAGGGACGTAGTC-3'	1824–1805*
CoNec F1	5'-AGACCTTCGGGTATGGGATCG-3'	470–490*
CoNec R1	5'-TCGGAATCGGAGTCCACC-3'	957–940*
CoEur F1	5'-CTCGCCTTCGGGTGAGG-3'	489–505**
CoEur R1	5'-GCCCCGTAGCGTGTGATGAC-3'	790–772**
