

PUBLISHER'S NOTE

Revised page numbering

We are pleased that Endangered Species Research (ESR), which began in 2004 as an online only journal, is now also available as a print publication.

With the launch of ESR's first print issues — Volume 1, containing articles appearing in 2004 and 2005, and Volume 2, containing articles appearing in 2006 — the volume, number, article and page numbering system has been changed retroactively.

The changes made to the citation format of each article published in Volume 1 are shown in the table below, and on the title page of the articles themselves.

The new numbering system was used exclusively for all articles published from November 2006.

We regret any inconvenience that the change may cause.

Otto Kinne
President of Inter-Research Science Center
and Founding Editor of ESR

Howard I. Browman
Scientific Director of Inter-Research Science Center

ESR Volume 1. Pagination of articles as originally published on the Inter-Research website and revised pagination as from November 2006. Articles are available online via the ESR home page at www.int-res.com/journals/esr/
