Supplement 9

Table S9.1: Microscopic counting of the most abundant phytoplankton taxa from the bloom events.

Taxon	carbon µg m ⁻³ 2014	carbon µg m ⁻³ 2015
<i>Dolichospermum</i> sp.	1184	17499
<i>Aphanizomenon</i> sp.	20652	75925
<i>Chaetoceros</i> sp.	195	2244
<i>Dinobryon</i> sp.	35	327
<i>Heterocapsa</i> sp.	211	512
<i>Nodularia spumigena</i>	82504	69744
Prymnesiales	32707	2713
<i>Pseudanabaena limnetica</i>	2417	21602
<i>Pyramimonas</i> sp.	2965	358
