

# Prevalence of nervous necrosis virus (NNV) and *Streptococcus* species in wild marine fish and crustaceans from the Levantine Basin, Mediterranean Sea

Ran Berzak, Aviad Scheinin, Nadav Davidovich, Yael Regev, Rei Diga, Dan Tchernov, Danny Morick\*

\*Corresponding author: dmorick@univ.haifa.ac.il

*Diseases of Aquatic Organisms* 133: 7–17 (2019)

**Table S1: A complete list of fish and crustaceans tested in this study.** For each fish and crustacean species tested in this study, weight and total length are mentioned, including the geographical location where samples were taken. Northern area is represented by Akko and Kishon locations; Southern area is represented by Yaffo and Ashdod locations. Final result for NNV and *Streptococcus* sp. reported as P-positive, N- negative, NA - not tested and accession number provided for all positive samples.
