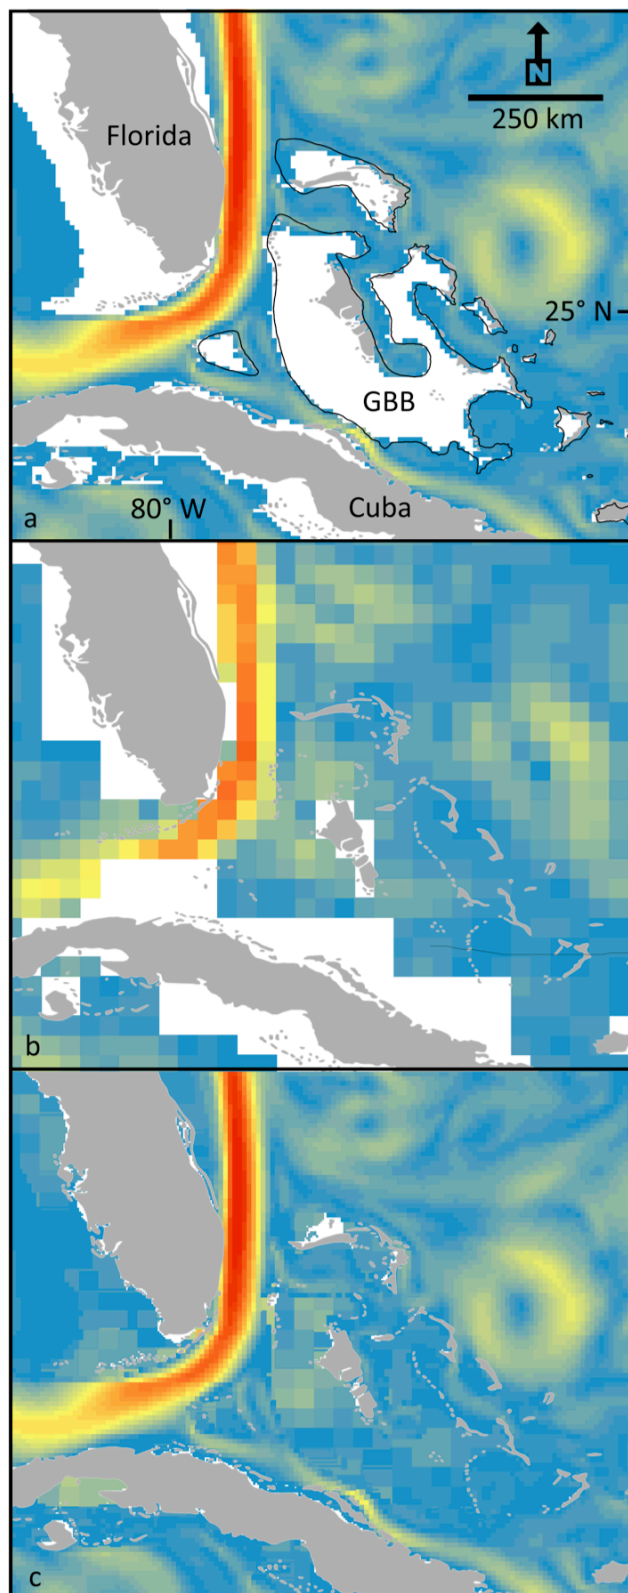

Fig. S1. Plots of the HYCOM, OSCAR, and OSCAR/HYCOM combined flow field datasets. Example ocean currents for June, 2006 from the HYCOM simulation data (a), OSCAR data (b), and the combined HYCOM/OSCAR flow field (c) used in the model. The Grand Bahama Bank (GBB) and smaller Bahamian banks are indicated with a thin black outline. Water velocity is color coded from slow (blue) to fast (red) (i.e. 0.00 to 1.48 m/s).
