Integrating analysis of regional climate change and response options

IPCC

INTERGOVERNMENTAL
PANEL ON
CLIMATE CHANGE

Editors:

Jose A. Marengo, Kristen Averyt,
Bruce Hewitson, Neil Leary,
Richard Moss

SPECIALS of Climate Research (CR) present important new information on climate phenomena, measured and assessed by closely coordinated group efforts. They concentrate on specific research themes or geographic areas.

CR SPECIAL 20 contains selected papers from a meeting of the IPCC Task Group on Data and Scenario Support for Impact and Climate Analysis (TGICA), held in 2007 to catalyze interdisciplinary research on climate change, impacts, adaptation, vulnerability and mitigation. The purpose of the Regional Meeting was to prepare a more holistic approach in the next IPCC assessment.

The meeting established a basis for integrative regional climate change research, explored innovative methods that address critical research needs, and facilitated communication and collaboration among researchers working on these issues. CR SPECIAL 20 will stimulate collaborative research that will advance regional climate change science and thus have value beyond the IPCC report.

We are pleased to make the online version of this CR SPECIAL available with Open Access.
