WMO

SPECIALS of Climate Research (CR) present important new information on climate phenomena measured, and assessed by closely coordinated group efforts. They concentrate on specific research themes or geographic areas.

CR SPECIAL 25 presents results of the Technical Conference on 'Changing Climate and Demands for Climate Services for Sustainable Development', held in Antalya, Turkey, in February 2010, with sponsorship by the World Meteorological Organization (WMO), the World Climate Research Programme (WCRP), the

Turkish State Meteorological Service (TSMS) and Météo-France.

The conference was designed to prepare recommendations on the improvement of climate predictions for the 15th Session of the Commission for Climatology (CCI) of the WMO. Contributions to CR SPECIAL 25 provide an overview of the climate information needed for sustainable adaptation of societies to climate change.

We are pleased to make the online version of this CR SPECIAL available with Open Access.
