Regional climate change in the NW Iberian Peninsula

Editors: Luís Gimeno
Ricardo M. Trigo
Moncho Gómez-Gesteira

SPECIALS of Climate Research (CR) present important new information on climate phenomena measured and assessed by closely coordinated group efforts. They concentrate on specific research themes or geographic areas.

CR SPECIAL 27 summarizes the state of knowledge about the observed and future climate change in the NW Iberian Peninsula.

In addition to describing the physical aspects of such climate changes, the contributions discuss the impacts of climate change on people, and how society responds or should respond.

We are pleased to make the online version of this CR SPECIAL available with Open Access
