

Erratum

New subtype of salmonid alphavirus (SAV), *Togaviridae*, from Atlantic salmon *Salmo salar* and rainbow trout *Oncorhynchus mykiss* in Norway

K. Hodneland, A. Bratland, K. E. Christie, C. Endresen, A. Nylund*

Dis Aquat Org 66: 113–120, 2005

• On page 116, in the 'Results', paragraph 1, sentence 3 should have read:

Two isolates, SavH10/02 (Accession No. AY604236) and SavH20/03 (Accession No. AY604235), were obtained from salmon diagnosed with cardiac myopathy syndrome (CMS) by the local veterinary service; 1 (SavSF21/03, Accession No. AY604238) was associated with 'classical' pancreas disease (PD), and 1 was isolated from rainbow trout (PD97-N3, Accession No. AY604237).

• On page 118, in the 'Discussion', paragraph 2, sentence 1 should have read:

Experimental challenges of salmon using NSAV isolates (authors' pers. obs.) seem to result in pathological changes associated with PD (Poppe & Rimstad 1989, Christie et al. 1998) and CMS in western Norway (Ferguson et al. 1990, Nylund 2001).
