

Erratum

Immune response in *Lutjanus erythropterus* induced by the major outer membrane protein (OmpU) of *Vibrio alginolyticus*

Shuang-Hu Cai*, Shao-Yun Yao, Yi-Shan Lu, Zao-He Wu, Ji-Chang Jian, Bei Wang

Diseases of Aquatic Organisms 90: 63–68, 2010

*Email: shuanghucai@gmail.com

The 'Materials and methods' section contained descriptive errors regarding the preparation of isolated OmpU antiserum, and the use of rabbit OmpU antigens in the vaccination response assay. The study was carried out as described in the following corrections, and hence the results of the study (illustrated in Fig. 3) are unchanged, and remain valid.

- On p. 64, col. 2, lines 34 to 35 (subsection heading) should simply read:
'Preparation of antiserum against *Vibrio alginolyticus*.'
 - On p. 64, col. 2, lines 45 to 47 (paragraph beginning 'Antiserum against the isolated OmpU ...') should be deleted
 - On p. 65, col. 1, lines 24 to 25 (in subsection 'Analysis of specific antibody levels') should read:
'Antibody binding to the antigen was detected using rabbit antiserum against *Lutjanus erythropterus* immunoglobulin M (IgM).'
-
