---

- On page 96, the reverse primer glaR for the conventional PCR test C1 was given incorrectly. The correct sequence is 5'-GTATGC CAG ACC CGC TAG ACC-3'

The first sentence of the section 'PCR tests' should thus read

The primers for the conventional PCR test C1 were forward primer ginF (5'-GGT ATC AAC GTA TAT TCG TTT GC-3') and reverse primer glaR (5'-GTA TGC CAG ACC CGC TAG ACC-3') (Sigma-Aldrich; Clouthier et al. 2013).
