-
- In the last paragraph of Section 2.13 on page 65, Cq_1 and Cq_2 were displayed the wrong way round in the formula for quantification of SAV3 particles. The correct formula is: $N_1 = N_2 \times (1 + E)^{(Cq_2 - Cq_1)}$.
 - Furthermore, in Section 2.14 on page 65, the formula for limit of detection (LOD) was incorrectly given as: $LOQ = 3.3\sigma/S$. The correct formula is: $LOD = 3.3\sigma/S$.
 - These corrections have been made in the online version of the article.
