

Antarctic fur seals foraging in the Polar Frontal Zone: inter-annual shifts in diet as shown from fecal and fatty acid analyses

Mary-Anne Lea, Yves Cherel, Christophe Guinet, Peter D. Nichols

Mar Ecol Prog Ser 245: 281–297, 2002

In Table 2, on page 286, several values appeared in the wrong columns. The corrected table is shown here.

Table 2. Mean abundance by number of fish (otoliths) and squid prey (lower beaks) in the diet of female Antarctic fur seals at Îles Kerguelen

	1998 (60/55)		1999 (24/21)		2000 (47/33)		Total (131/109)
