- In Table 3 on page 182, dashes were in the wrong places. The corrected table is shown below.

Table 3. Results of BIO-ENV analyses. The environmental variables that in combination best correlated with the biological data are marked with an 'x', and the single most important variable in the correlation is marked 'X'. Spearman's rank correlation coefficients (ρ) are given for the best combination and the single best variable. CTC: critical tidal connection; CD: channel distance; ZP: zooplankton. (–) Not examined
