

THEME SECTION

Jellyfish blooms and ecological interactions

Editors: Robert H. Condon, Cathy H. Lucas, Kylie A. Pitt, Shin-ichi Uye

Marine Ecology Progress Series Vol. 510, pages 107–288

CONTENTS

In Memoriam Hermes Mianzan	108	Treible LM, Lonsdale DJ, Gobler CJ Role of the ctenophore <i>Mnemiopsis leidyi</i> in nutrient cycling in Long Island Sound, New York, USA	215–227
Condon RH, Lucas CH, Pitt KA, Uye SI <i>INTRODUCTION</i> : Jellyfish blooms and ecological interactions	109–110	Fleming NEC, Harrod C, Griffin DC, Newton J, Houghton JDR Scyphozoan jellyfish provide short-term reproductive habitat for hyperiid amphipods in a temperate near-shore environment	229–240
Stone JP, Steinberg DK Long-term time-series study of salp population dynamics in the Sargasso Sea	111–127	Schiariti A, Morandini AC, Jarms G, von Glaehn Paes R, Franke S, Mianzan H Asexual reproduction strategies and blooming potential in Scyphozoa	241–253
Luo JY, Grassian B, Tang D, Irisson JO, Greer AT, Guigand CM, McClatchie S, Cowen RK Environmental drivers of the fine-scale distribution of a gelatinous zooplankton community across a mesoscale front	129–149	Fu Z, Shibata M, Makabe R, Ikeda H, Uye SI Body size reduction under starvation, and the point of no return, in ephyrae of the moon jellyfish <i>Aurelia aurita</i>	255–263
McNamara ME, Lonsdale DJ, Cerrato RM Role of eutrophication in structuring planktonic communities in the presence of the ctenophore <i>Mnemiopsis leidyi</i>	151–165	Lilley MKS, Ferraris M, Elineau A, Berline L, Cuvilliers P, Gilletta L, Thiéry A, Gorsky G, Lombard F Culture and growth of the jellyfish <i>Pelagia noctiluca</i> in the laboratory	265–273
Brodeur RD, Barceló C, Robinson KL, Daly EA, Ruzicka JJ Spatial overlap between forage fishes and the large medusa <i>Chrysaora fuscescens</i> in the northern California Current region	167–181	Kogovšek T, Tinta T, Klun K, Malej A Jellyfish biochemical composition: importance of standardised sample processing	275–288
Breitburg DL, Burrell R Predator-mediated landscape structure: seasonal patterns of spatial expansion and prey control by <i>Chrysaora quinquecirrha</i> and <i>Mnemiopsis leidyi</i>	183–200		
Purcell JE, Tilves U, Fuentes VL, Milisenda G, Olariaga A, Sabatés A Digestion times and predation potentials of <i>Pelagia noctiluca</i> eating fish larvae and copepods in the NW Mediterranean Sea	201–213
