-
- In the 'Materials and methods' section 'Morphometric index of condition' on page 221, the α_m value for sardine was incorrectly given as: $\alpha_m = 9.1 \times 10^{-3} \pm 9.2 \times 10^{-4}$

The correct value is: $\alpha_m = 6.1 \times 10^{-3} \pm 9.2 \times 10^{-4}$
