-
- In the Abstract, estimated total abundance was incorrectly given as '256 434 (95% CrI: 171 047–364 659)', where CrI is credible interval. The correct values are 257 193 (95% CrI: 171 138–366 366).
 - In Section 2.2 on p 173, a "1" was incorrectly inserted into the lower right element of the unnamed matrix in the second column, which occurred during production.
 - In Section 4 on p 179, the contemporary abundance estimate was incorrectly given as 257 192 instead of 257 193.
 - These errors have been amended in both the print and online versions of the article.
