Supplement 2

Figure S1. Occurrence of OTUs > 3 sites (sum = 1670 from 4612 total) by altitudinal groups

Explanation figure S1: Graph showing direct comparison of OTUs at >3 sites by elevation. The three bars (= three altitudinal levels: low, middle, high) show all OTUs out of a total 1670 present in the respective elevation level sorted into groups as indicated in legend (green = only present in high or low – 20.24% of OTUs, blue = present in high and low – 62.22% of OTUs).
