Marine Ecology Progress Series https://doi.org/10.3354/meps12302

Table S1. Expected otolith $\delta^{18} \mathrm{O}$ signatures (mean $\pm \mathrm{SD}$ in \%o) at monthly, seasonal (LA/EW, LW/ES, LS/ES and LS/EA) and annual (year) scales, over the full distribution range (global) or in each area frequented over the course of the year. At each spatio-temporal scale, the number of daily temperature/salinity observations extracted from the 1997, 1998 and 1999 datasets and used for $\delta^{18} \mathrm{O}$ calculations is given in brackets (italics). EC: English Channel; SNS: Southern North Sea; WNS: Western North Sea; CNS: Central North Sea; ENS: Eastern North Sea; NNS: Northern North Sea.

|  | EC | SNS | WNS | CNS | ENS | NNS | global |
