The following appendix accompanies the article

Appendix 1. Biomass and energetics of all compartments in flow networks of the 9 intertidal subsystems of the Sylt-Rømø Bight. Biomass and standing stocks in mg C m–2; GPP, NPP, C, P, R, & E in mg C m–2 d–1. The effective trophic level position of each component is given in brackets below the compartment number.

The following appendix accompanies the article

Appendix 1. Biomass and energetics of all compartments in flow networks of the 9 intertidal subsystems of the Sylt-Rømø Bight. Biomass and standing stocks in mg C m–2; GPP, NPP, C, P, R, & E in mg C m–2 d–1. The effective trophic level position of each component is given in brackets below the compartment number.

Trophic dynamics of eight intertidal communities of the Sylt-Rømø Bight ecosystem.

Dan Baird, Harald Asmus, *Ragnhild Asmus*
