

The following supplement accompanies the article

Changing spatial distribution of fish stocks in relation to climate and population size on the Northeast United States continental shelf

Janet A. Nye^{1,*}, Jason S. Link¹, Jonathan A. Hare², William J. Overholtz¹

Supplement

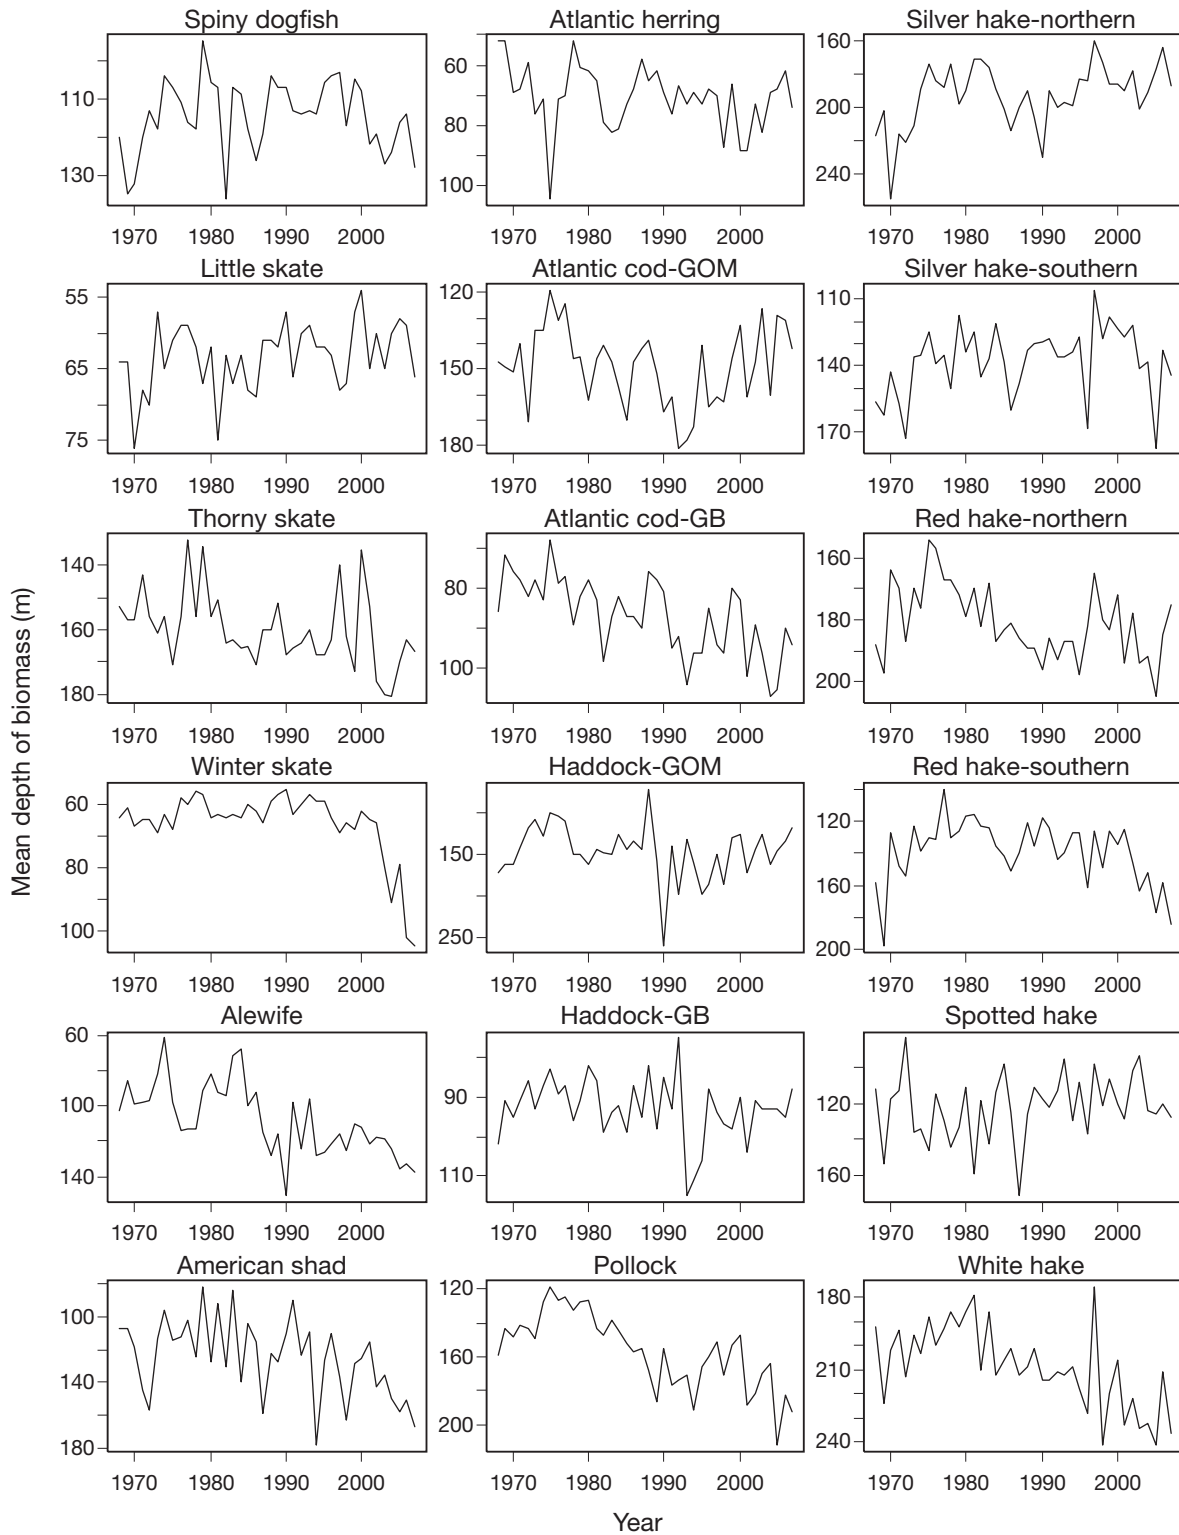

Fig. S1. Time series of mean depth of occurrence for 36 fish stocks caught during the Northeast Fisheries Science Center (NEFSC) multispecies survey

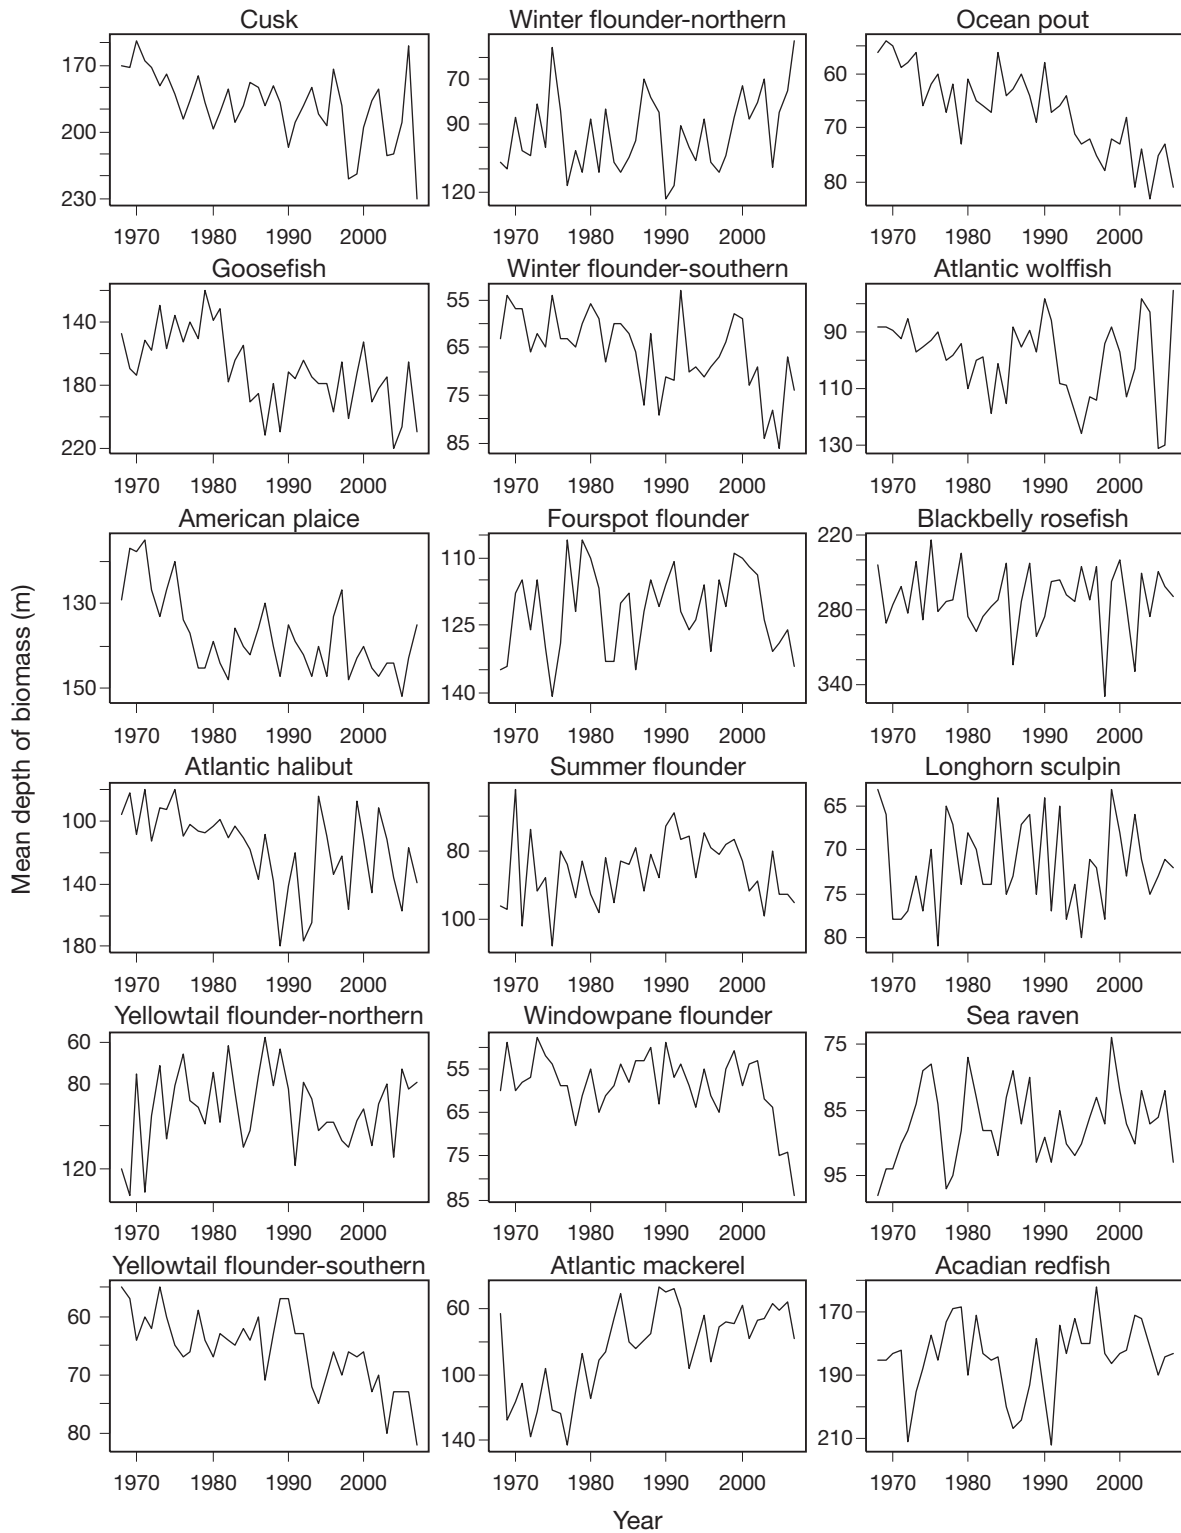

Fig. S1 (continued)

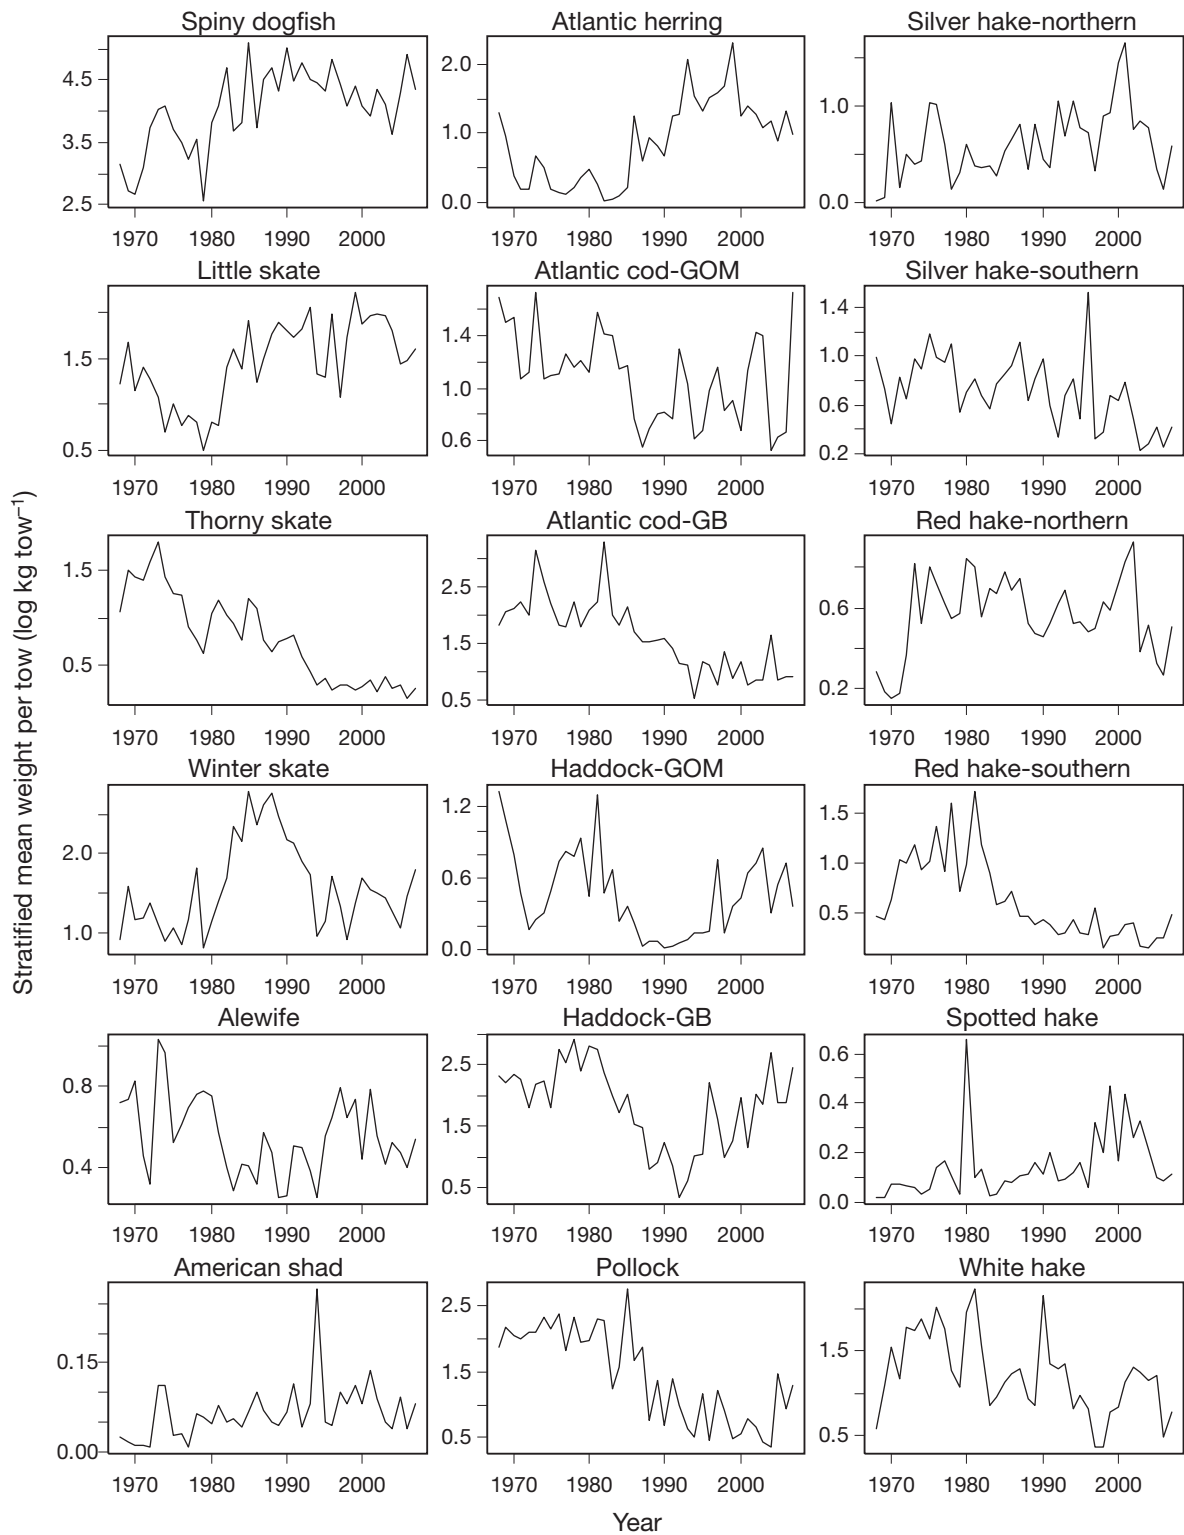

Fig. S2. Time series of population biomass (stratified mean weight per tow, log transformed) for 36 fish stocks caught during the Northeast Fisheries Science Center (NEFSC) multispecies survey. Note that the scale on the y-axis is different for each stock

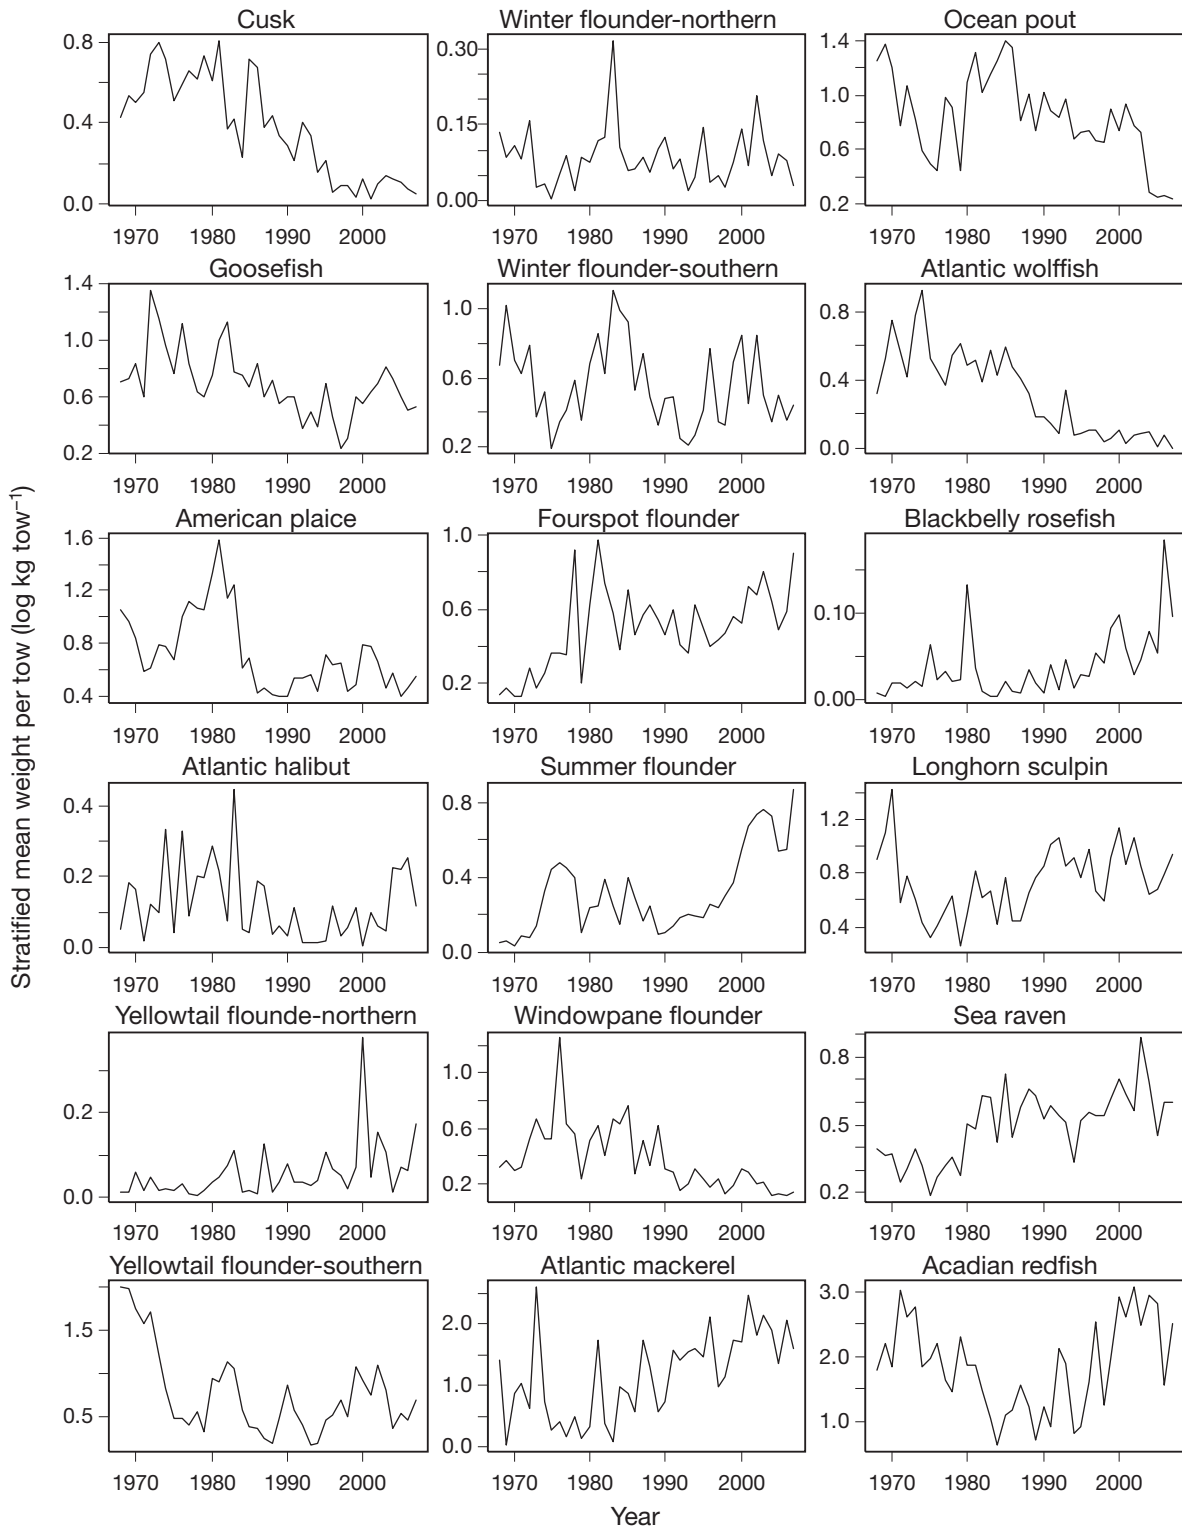

Fig. S2 (continued)

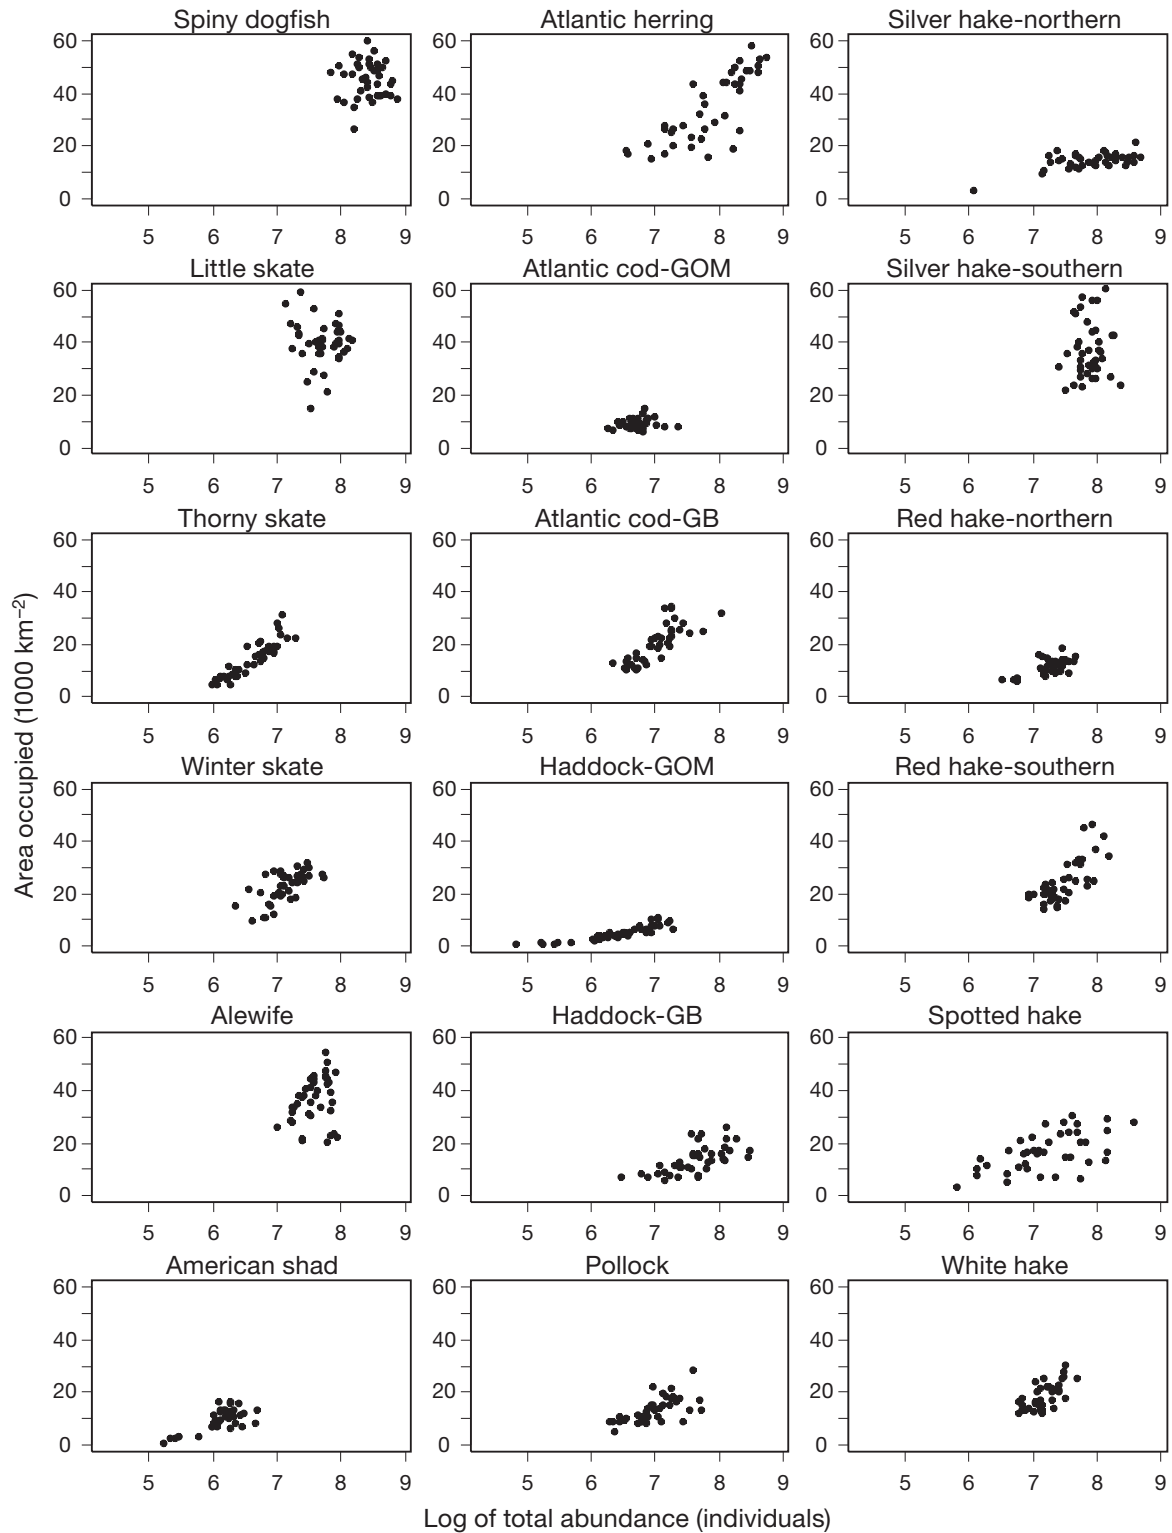

Fig. S3. Area–abundance relationships for 36 fish stocks caught during the Northeast Fisheries Science Center (NEFSC) multispecies survey

Fig. S3 (continued)
