Marine Ecology Progress Series 584: 229–244 (2017)

Table S1. Preferred prey and winter habitat of common bird species in the intertidal. Adapted from Goss-Custard et al. (2006).

Species	Preferred Prey Genus	Preferred Winter Habitat	References
Bar-tailed Godwit <i>Limosa lapponica</i>	<i>Scrobicularia</i> <i>Macoma</i> <i>Hediste</i> ¹ <i>Arenicola</i>	Tidal sand and muddy-sand flats in intertidal estuaries. Associated with more exposed bays and estuaries.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Black-tailed Godwit <i>Limosa limosa</i>	<i>Scrobicularia</i> <i>Macoma</i> <i>Hediste</i> ¹ <i>Crangon</i>	Subspecies <i>limosa</i> favours freshwater wintering habitats, while <i>islandica</i> winters on intertidal mudflats in sheltered bays and estuaries. Favours muddier sites than <i>L. lapponica</i> which winters in sandier areas.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Eurasian Curlew <i>Numenius arquata</i>	<i>Mya</i> <i>Cerastoderma</i> <i>Scrobicularia</i> <i>Macoma</i> <i>Hediste</i> ¹ <i>Arenicola</i> <i>Carcinus</i>	Sheltered mud and sandflats in coastal areas and estuaries.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).

Species	Preferred Prey Genus	Preferred Winter Habitat	References
Eurasian Oystercatcher <i>Haematopus ostralegus</i>	<i>Mytilus</i> <i>Mya</i> <i>Cerastoderma</i> <i>Scrobicularia</i> <i>Macoma</i> <i>Hediste</i> ¹ <i>Arenicola</i> <i>Carcinus</i>	Widespread in coastal areas including rocky and sandy shores, commonly winters on estuarine mud and sandflats and areas of saltmarsh. Favours sandier habitats over finer sediments.	Johnsgard (1981), Goss-Custard et al. (1992), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Common Redshank <i>Tringa totanus</i>	<i>Mya</i> <i>Scrobicularia</i> <i>Macoma</i> <i>Hydrobia</i> <i>Corophium</i> <i>Hediste</i> ¹ <i>Carcinus</i> <i>Crangon</i>	Various coastal habitats although mainly estuaries and coastal lagoons where they are most associated with sheltered tidal mudflats.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Dunlin <i>Calidris alpina</i>	<i>Scrobicularia</i> <i>Macoma</i> <i>Hydrobia</i> <i>Corophium</i> <i>Hediste</i> ¹	Estuarine and coastal tidal flats. Prefers muddier sites.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Red Knot <i>Calidris canutus</i>	<i>Mytilus</i> <i>Mya</i> <i>Cerastoderma</i> <i>Scrobicularia</i> <i>Macoma</i> <i>Hydrobia</i> <i>Hediste</i> ¹	Sheltered coasts, tidal mud and sandflats. Sheltered sandy beaches.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Grey Plover <i>Pluvialis squatarola</i>	<i>Scrobicularia</i> <i>Macoma</i> <i>Hydrobia</i> <i>Hediste</i> ¹ <i>Arenicola</i>	Intertidal mudflats, sandflats and saltmarsh in coastal areas, sheltered bays and estuaries	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).

Species	Preferred Prey Genus	Preferred Winter Habitat	References
Ringed Plover <i>Charadrius hiaticula</i>	<i>Hydrobia</i> <i>Corophium</i> <i>Hediste</i> ¹	Sandy and gravel shores and tidal mud and sandflats.	Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).
Sanderling <i>Calidris alba</i>	<i>Crangon</i> <i>Nerine</i> <i>Bathyporeia</i> <i>Eurydice</i>	Sandy beaches on open exposed coastlines.	Johnsgard (1981), Brearey, (1982) del Hoyo et al. (1996), Goss-Custard et al. (2006).
Common Shelduck <i>Tadorna tadorna</i>	<i>Hydrobia</i> <i>Macoma</i> <i>Corophium</i> <i>Nereis</i> ¹	Muddy and sandy coastlines and tidal flats.	Olney, (1965), Johnsgard (1981), del Hoyo et al. (1996), Goss-Custard et al. (2006).

¹ Along with other polychaete worms

Table S3. Publications not included in the analysis, indicating rationale for exclusion

Publication	Exclusion Rationale
Brylinsky M, Gibson J, Gordon Jr DC (1994) Impacts of Flounder Trawls on the Intertidal Habitat and Community of the Minas Basin, Bay of Fundy. <i>Can J Fish Aquat Sci</i> 51:650-661	Gear used (flounder trawl) is unique with regards to intertidal fishing and as far as the authors are aware is limited to the Bay of Fundy. Therefore not a representative intertidal harvesting method.
Dernie K, Kaiser M, Richardson E, Warwick R (2003) Recovery of soft sediment communities and habitats following physical disturbance. <i>J Exp Mar Biol Ecol</i> 285:415-434	Significant outlier in analysis. Large bias and therefore excluded.
Stagnol D, Renaud M, Davout D (2013) Effects of commercial harvesting of intertidal macroalgae on ecosystem biodiversity and functioning. <i>Estuar Coast Shelf Sci</i> 130:99-110	Harvesting carried out in rocky intertidal habitats. Not representative.
Godcharles MF (1971) A study of the effects of a commercial hydraulic clam dredge on benthic communities in estuarine areas. Florida Dept. of Natural Resources Technical Series No. 64	Cannot obtain full text
Glude JB, Landers WS (1953) Biological effects on hard clams of hand raking and power dredging, Vol 110. US Department of the Interior, Fish and Wildlife Service	No usable data.
Boldina I, Beninger PG (2014) Fine-scale spatial distribution of the common lugworm <i>Arenicola marina</i> , and effects of intertidal clam fishing. <i>Estuar Coast Shelf Sci</i> 143:32-40	No usable data.
Watson GJ, Farrell P, Stanton S, Skidmore LC (2007) Effects of bait collection on <i>Nereis virens</i> populations and macrofaunal communities in the Solent, UK. <i>J Mar Biol Assoc UK</i> 87:703-716	No usable data. Data reported not traceable to sampling method.
Simenstad CA, Fresh KL (1995) Influence of intertidal aquaculture on benthic communities in Pacific Northwest estuaries: scales of disturbance. <i>Estuaries</i> 18:43-70	Study investigates addition of gravel for aquaculture rather than harvesting. Not relevant to our study aims.
Moreno CA, Sutherland JP, Jara HF (1984) Man as a predator in the intertidal zone of southern Chile. <i>Oikos</i> 42:155-160	No usable data.
Fiordelmondo C, Manini E, Gambi C, Pusceddu A (2003) Short-term impact of clam harvesting on sediment chemistry, benthic microbes and meiofauna in the Goro lagoon (Italy). <i>Chem Ecol</i> 19:173-187	No relevant responses reported.
Cook W (1991) Studies on the effects of hydraulic dredging on cockle and other macroinvertebrate populations 1989-1990. North Western and North Wales Sea Fisheries Committee.	Cannot obtain full text.
de Boer WF, van Schie AM, Jocene DF, Mabote AB, Guissamulo A (2001) The impact of artisanal fishery on a tropical intertidal benthic fish community. <i>Environ Biol Fishes</i> 61:213-229	No usable data. Experimental design unclear.

Publication	Exclusion Rationale
Cryer M, Whittle GN, Williams R (1987) The impact of bait collection by anglers on marine intertidal invertebrates. Biol Conserv 42:83-93	No variance reported.
Pickett G (1973) The impact of mechanical harvesting on the Thames Estuary cockle fishery. Laboratory Leaflet No. 29. Ministry of Agriculture, Fisheries and Food	No usable data.
van den Heiligenberg T (1987) Effects of mechanical and manual harvesting of lugworms <i>Arenicola marina</i> L. on the benthic fauna of tidal flats in the Dutch Wadden Sea. Biol Conserv 39:165-177	No variance reported.
Beukema J (1995) Long-term effects of mechanical harvesting of lugworms <i>Arenicola marina</i> on the zoobenthic community of a tidal flat in the Wadden Sea. Neth J Sea Res 33:219-227	No variance reported.
Park SR, Kim YK, Kim J-H, Kang C-K, Lee K-S (2011) Rapid recovery of the intertidal seagrass <i>Zostera japonica</i> following intense Manila clam (<i>Ruditapes philippinarum</i>) harvesting activity in Korea. J Exp Mar Biol Ecol 407:275-283	Response only reported for <i>Zostera japonica</i> . Not relevant for research question.
Piersma T, Koolhaas A, Dekkinga A, Beukema JJ, Dekker R, Essink K (2001) Long-Term Indirect Effects of Mechanical Cockle-Dredging on Intertidal Bivalve Stocks in the Wadden Sea. J Appl Ecol 38:976-990	Sample size unclear.
