Supplement. Additional data

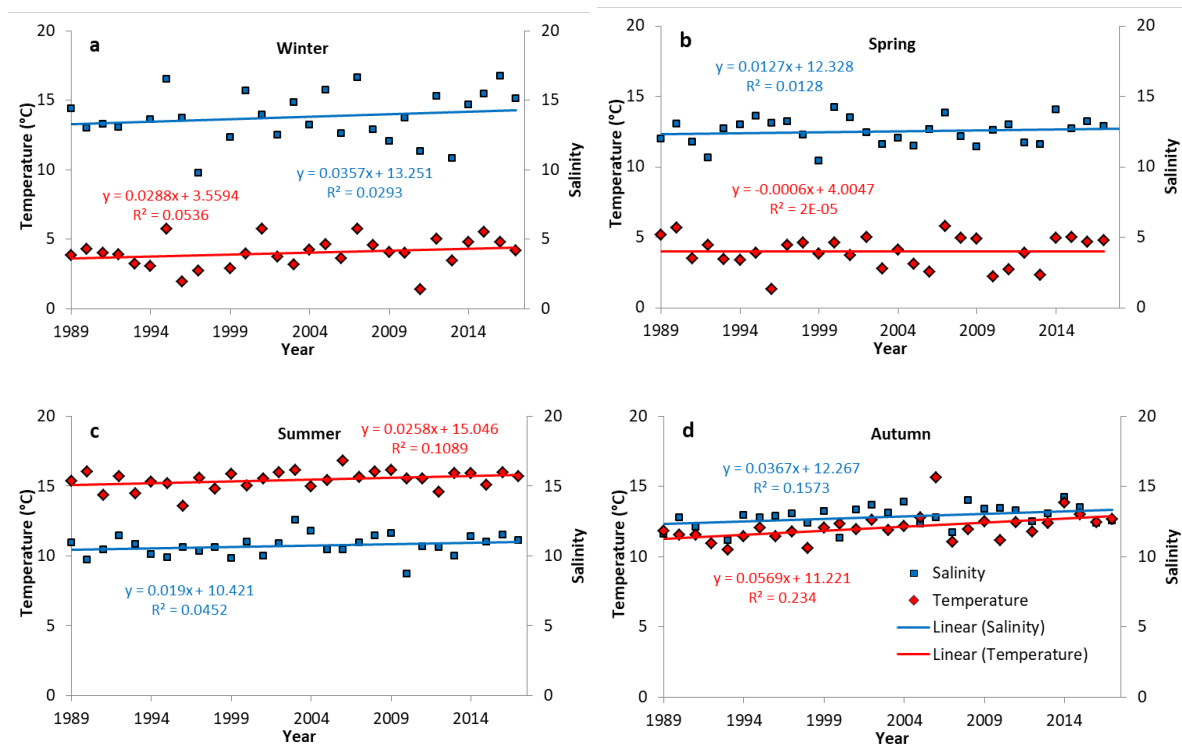

Fig. S1: Trends in the seasonal averages of water temperature and salinity at the investigation station.

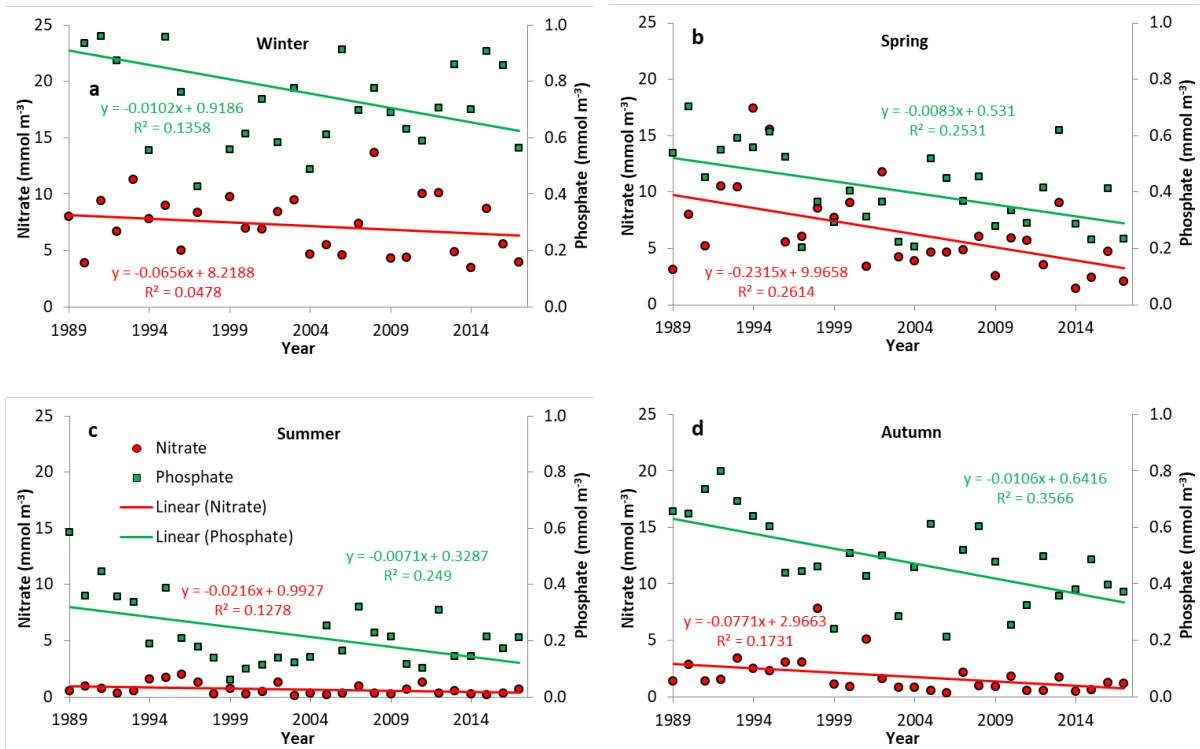

Fig. S2: Trends in the seasonal averages of inorganic nutrients at the investigation station.

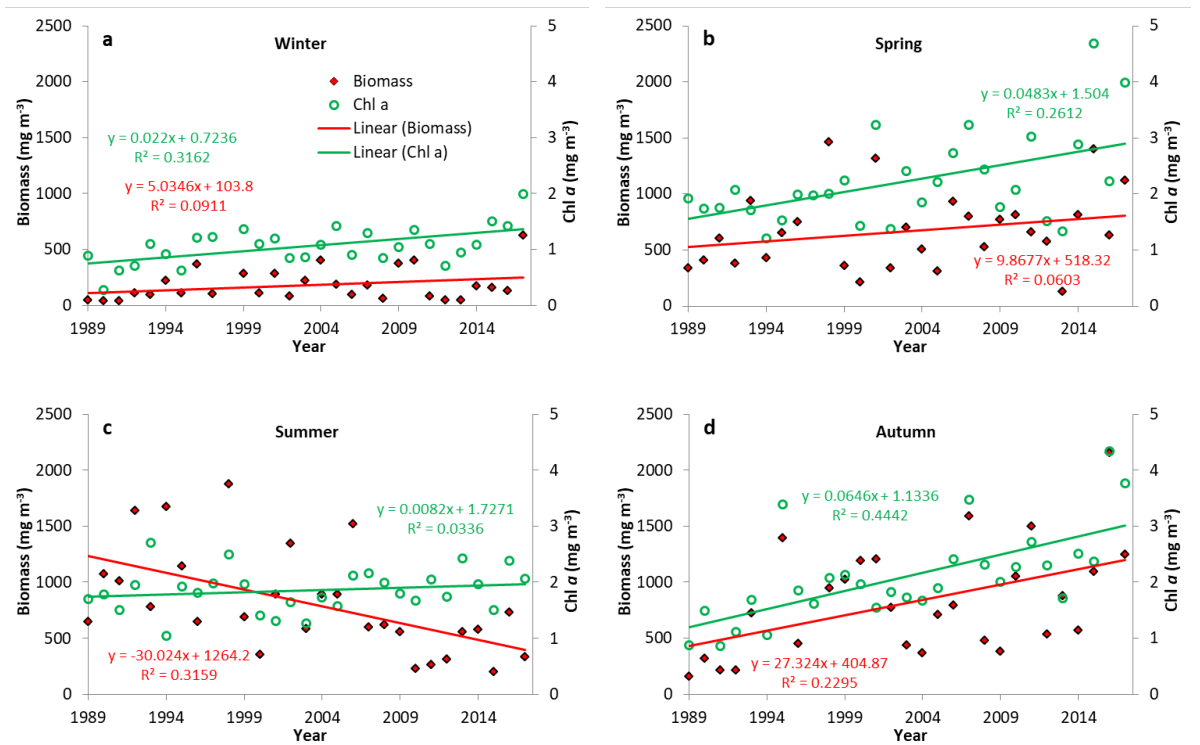

Fig. S3: Trends in the seasonal averages of phytoplankton biomass and chl a concentration.

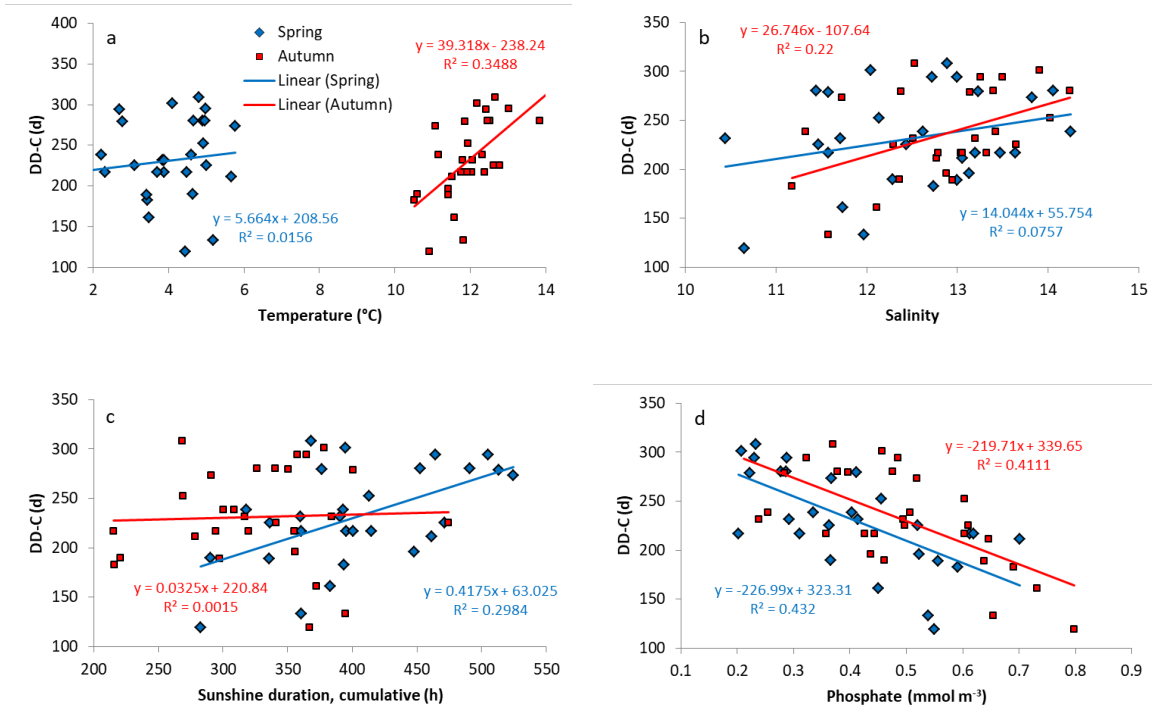

Fig. S4: Regression lines for the duration of the chl-a-based vegetation period (DD-C) related to (a) water temperature, (b) salinity, (c) sunshine duration and (d) phosphate concentrations in spring and autumn 1989-2017.
