**Table S1.** Blenny tissue samples used in this study. *Istiblennius lineatus* and *Istiblennius steindachneri* samples are in the same order as the gel in Figure 1A, B, and C (left to right). Samples with an asterisk (\*) were used for PCR only. JFBM = James Ford Bell Museum of Natural History, University of Minnesota.

<b>Species</b>	<b>Specimen I.D.</b>	<b>JFBM Catalog #</b>	<b>Sex</b>	<b>Locality</b>
