**Figure S1.** Habitat types within Alabama and Mississippi waters including rivers and subembayments (Rivers/ sub.), open waters in Mobile Bay, Mississippi Sound, and the Gulf of Mexico within 2 km of shore (Open), Mobile-Tensaw Delta (Delta), the Intracoastal Waterway (ICW), and the Gulf of Mexico more than 3.2 km from shore (offshore nGOM). Note that Delta and ICW locations apply to Alabama sightings only.
Figure S2. Opportunistic live manatee sightings in offshore northern Gulf of Mexico waters beyond state borders.

Figure S3. Locations of manatee carcasses in Alabama and Mississippi waters documented historically (1912-2006) and since inception of (2007-2014) DISL/MSN.
Figure S4. Number of opportunistic sightings of manatees in different group sizes (1-17 animals) in Alabama and Mississippi waters, separated by month for all years combined. The relative size of each circle represents the number of sightings reported for each group size.
Figure S5. Number of internet-based public outreach items per month (top) and non-internet based public outreach items per month (middle) or year (bottom) generated by DISL/MSN from 2008-2014.
