

Figure S1: Start point locations for diver surveys used to estimate abundance. Black diamonds = locations inside mussel farms and locations outside mussel farms (Reference sites) = white dots. Marchwater = blue, Richmond Bay = Purple, and Bentick Cove = Red.

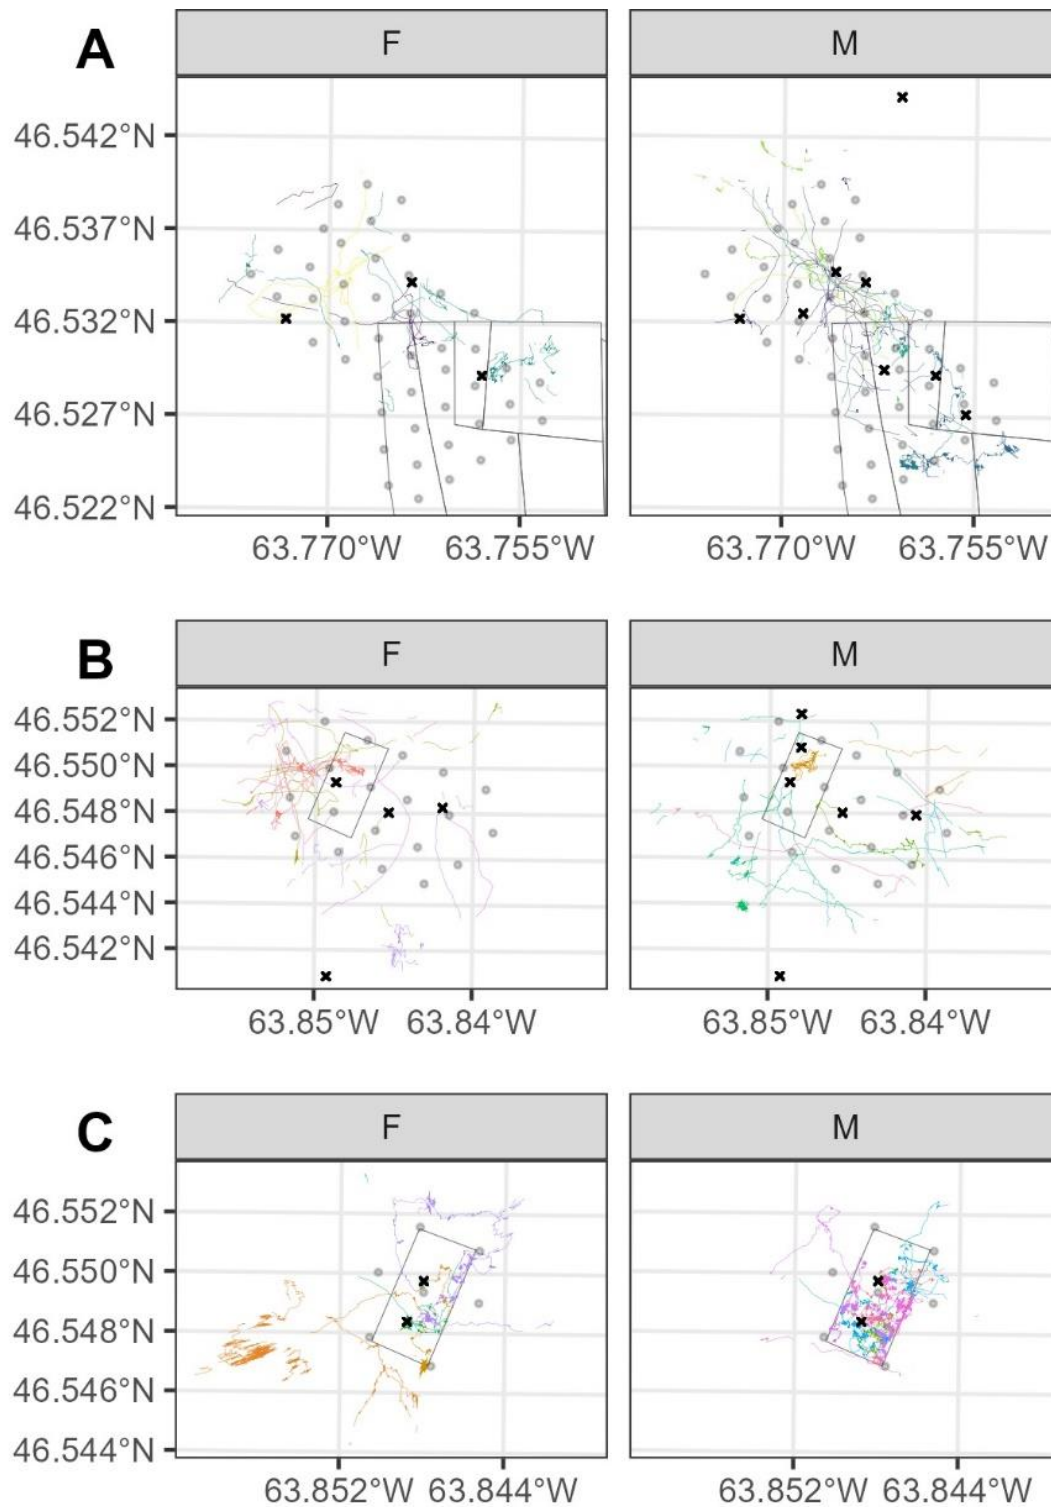

Figure S2: Lobster and crab tracks from field experiments 2 (A and B) and 3 (C). F = female and M = Male, grey circles = acoustic telemetry receivers, grey outline = mussel farm perimeters, black crosses = release locations. Each colour represents a different individual. A) lobsters tracked in MW after fishing in 2015, B) lobsters tracked in RB 2015, C) crabs tracked in RB 2016.
