

Inter-Research Science Center Accessibility Roadmap

Version 1.0

Last updated: 17.04.2026

Summary

The Inter-Research Accessibility Roadmap tracks planned or carried out actions related to the accessibility of our website and published content.

Inter-Research is committed to improve accessibility standards on its website and in our publication. Therefore, Inter-Research has already implemented many action items in the re-development of our website and publications prior to April 2026. These items are not listed below.

If more information is required on any of these items, please do not hesitate to contact our [Customer Support team](#).

Outstanding Accessibility Action Items

This table details ongoing accessibility related issues on our website and within our publications, as well as any items discovered through testing or customer reports.

Reference	Platform	Item description	Current status
1.1	int-res.com	Alternative texts for figures, images and icons on int-res.com	in progress
2.1	int-res.com	Article listing tables on TOC pages lack proper table header elements with scope attributes.	in progress
2.2	int-res.com	Some web content structure currently relies on visual presentation rather than semantic markup.	pending
2.3	int-res.com	Some pages may contain text hyperlinks without an underline, making them difficult for users to distinguish.	pending
2.4	int-res.com	Some repeated navigational elements on journal pages cannot be bypassed.	in progress
2.5	int-res.com	Some PDFs have browser tab/window titles but some lack descriptive titles.	pending
2.6	int-res.com	Some modal dialogs and dropdowns have focus management issues	pending
2.7	int-res.com	Some website links lack a descriptive link or ARIA-label attribute. Additionally, some pages, such as the author guidelines, contain links with the same text which lead to different locations.	pending
2.8	int-res.com	Submission forms provide basic error messages but do not always include programmatic labelling.	in progress
2.9	int-res.com	Search fields have labels, but some filter controls lack visible labels or proper ARIA labeling.	pending
2.10	int-res.com	Some interactive components (custom dropdowns, tab interfaces) lack proper ARIA roles and properties.	pending
3.1	int-res.com	Text can be resized to 200% but some layout breaks occur at larger sizes, causing horizontal scrolling. Some fixed-width containers do not accommodate enlarged text.	pending
3.2	int-res.com	Not all pages have breadcrumb navigation.	pending
3.3	int-res.com	Heading hierarchy is present but skips levels on some pages, e.g., h1 to h3.	in progress
3.4	int-res.com	Default browser focus indicator present but may be difficult to see against some backgrounds. No enhanced focus styling applied.	pending
4.1	int-res.com	Use ARIA attributes throughout the website.	pending
