Table A1. *Heptranchias perlo*. Dietary composition for small and large individuals. Mean percentage mass (%M), mean percentage number (%N), mean percentage frequency of occurrence (%FO), mean percentage index of relative importance (%IRI), $\pm 95\%$ confidence intervals, and comparison between %IRI and a point estimate of %IRI (%IRI_{PE}), expressed as percentage variability. Unid.: unidentifiable; n = 53 and 35 with prey for small and large *H. perlo*, respectively
